

CITY OF HEMET

Environmental Justice Element and Safety Element Update Online Community Workshop

As part of the 2021 – 2029 Housing Element Update, the City of Hemet is updating its existing Safety Element and undertaking its first Environmental Justice Element process. The Environmental Justice Element will promote policies to reduce health risks and exposure to environmental pollution, improve access to public facilities and services, and address concerns related to food access and insecurity, safe and sanitary homes, and clean water. This workshop will also address needed updates to the Safety Element to address legislation requiring safety elements to address increased wildfire risks, evacuation routes, and climate vulnerability. Please join us for an online workshop to learn about the Environmental Justice process and the updates to the Safety Element.

The online meeting will focus on:

- Identifying disadvantaged communities within Hemet
- Defining issues of community concern related to health risk, air quality, clean water, housing, transportation, and public services
- Identifying environmental justice policies or objectives for consideration
- Previewing Safety Element updates, including Hemet's first Climate Vulnerability Assessment

WHEN: Wednesday, May 11, 2022 at 6 PM

WHERE: Online via your computer or smartphone
